PROFESSIONAL SUMMARY

Full Stack Developer specializing in MERN stack with hands-on experience building scalable web applications. Developed secure authentication systems using JWT and bcrypt, and built RESTful APIs with Node.js and Express. Improved application performance and resolved real-world issues like CORS and API integra-tion. Passionate about building efficient, user-centric solutions.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python (Basics)
Frontend: React.js, React Router, HTML5, CSS3, Axios
Backend: Node.js, Express.js, REST APIs
Frameworks & Libraries: Bootstrap and Tailwind CSS
Database: MongoDB, Mongoose
Authentication: JWT, bcrypt
Tools: Git, GitHub, VS Code
DevOps / CI/CD: Azure DevOps (Pipelines, Artifacts)

PROJECTS

E-Commerce Web Application (MERN Stack)

A full-stack e-commerce platform built using MongoDB, Express.js, React.js, and Node.js, designed to deliver a smooth and responsive online shopping experience.

Key features:
- User authentication & authorization (JWT-based login/signup)
- Product listing, search, and filtering
- Shopping cart and checkout flow
- Order management and user dashboard
- RESTful APIs for product, cart, and order operations
- Responsive UI built with React and [Tailwind CSS]

This project helped me strengthen my understanding of full-stack architecture, API design, state management, and building secure, scalable web applications end to end.

EDUCATION

GATE INSTITUTE OF TECHNOLOGY AND MANAGEMENT SCIENCES — *CGPA: 8.0*
Masters in Computer Applications — 2025 – 2027

ADDITIONAL SKILLS

- Good understanding of full-stack development and how frontend and backend work together.
- Able to build clean, reusable, and user-friendly components using React.
- Understanding of authentication flow using JWT and secure data handling.
- Able to understand application flow and improve performance where needed.
- Quick learner and able to adapt to new tools and technologies.
