SAMMETA SRAVAN KUMAR

Full Stack Developer | MERN Stack | React.js | Node.js
Tirupati, India | sammetasravan2002@gmail.com | 9581153158 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on MERN stack experience building and debugging scalable, secure web applications. Built RESTful APIs with Node.js and Express, implemented JWT/bcrypt-based authentication, and resolved real-world integration issues (CORS, API errors) to improve application performance. Used Git for version control throughout development and is comfortable working across the frontend and backend of a project. Quick learner, eager to collaborate with designers and product teams and contribute in a fast-paced engineering environment.

EDUCATION

Dr. AER Degree & PG College, Tirupati *Jun 2020 – Oct 2024*
Bsc. Computer Science (CGPA: 7.3)

TECHNICAL SKILLS

Frontend:	React.js, React Router, HTML5, CSS3, Axios, Responsive Web Design, Redux Toolkit
Backend:	Node.js, Express.js, REST API Development & Backend Integration
Database:	MongoDB, Mongoose (NoSQL), basic working knowledge of SQL concepts
Languages:	JavaScript (ES6+), Python (Basics)
Tools:	Git, GitHub, Responsive Web Design, Agile / Scrum
Authentication:	JWT, bcrypt, secure session/auth flows
Frameworks / UI:	Bootstrap, Tailwind CSS, and Material UI

EXPERIENCE

Full Stack Web Developer Intern | Devgnan Technologies *Jan 2026 – Aug 2026*

- Gained hands-on experience in **end-to-end web application development**, contributing to the design, development, integration, testing, and refinement of responsive full-stack applications.
- Worked on an **IRCTC-inspired Train Ticket Booking System**, gaining practical experience in translating real-world requirements into features such as train search, seat availability, booking workflows, booking history, and administrative management.
- Developed experience in **building and integrating frontend and backend modules**, designing data models, implementing secure authentication, handling API-driven workflows, and maintaining consistency across interconnected application features.
- Gained practical exposure to **solving real-world application challenges**, including concurrent seat booking, data consistency, reusable component development, responsive UI implementation, debugging, and following structured development practices within an Agile environment.

PROJECTS

E-Commerce Website | *MERN STACK (React.js, Tailwind CSS, Node.js, MongoDB)*

- Implemented JWT-based user authentication and authorization for secure login/signup
- Built product listing, search, and filtering with a responsive UI in React and Tailwind CSS
- Designed shopping cart, checkout flow, order management, and a user dashboard
- Developed and integrated RESTful API's for product, cart, and order operations using Node.js and Express
- Debugged and resolved cross-origin (CORS) and API integration issues to improve reliability and performance
- Used Git/GitHub for version control across the development lifecycle
